BAB I: PENDAHULUAN & ARSITEKTUR SISTEM

BREWTECH adalah platform perangkat lunak berbasis layanan (SaaS) yang dirancang secara khusus untuk mengatasi kesenjangan antara dunia pendidikan khusus (Sekolah Luar Biasa / SLB) dan industri kerja komersial (Food & Beverage / Kafe). Melalui pendekatan vokasi terintegrasi, Brewtech memberdayakan siswa penyandang disabilitas agar memperoleh keterampilan profesional sebagai barista dan tenaga kerja kafe mandiri.

Empat Pilar Utama Ekosistem Brewtech

- **LMS Vokasi Berbasis Gamifikasi:** Kurikulum pelatihan barista berstandar industri dengan materi visual, video, dan kuis interaktif.
- **Sistem Pendukung Keputusan (SPK) MCDM:** Engine Multi-Criteria Decision Making komprehensif mengimplementasikan 3 algoritma (SAW, WP, TOPSIS) berbasis 6 kriteria kejuruan (C1-C6).
- **Hilirisasi Industri & Kasir POS Kafe:** Modul kasir Point-of-Sale (POS) terintegrasi pada Kafe Mitra (seperti Kafe Among Rasa) yang menjadi wadah kerja nyata siswa.
- **Portal Wali Murid Transparan:** Transparansi penuh bagi orang tua/wali untuk memantau kehadiran, progres modul, catatan instruktur, dan perkembangan psikososial anak.
